

Open joint-stock company «Vitebsky zavod elektroizmeritelnykh priborov»

**JSC «VZEP»**

Vitebsk, Belarus

## **OFFER**

**JSC “VZEP” for the purpose of expansion of sales markets addresses with the offer on rendering assistance in search of constant partners within opportunities available for you according to the solution of trade and economic and investment questions. We are interested in cooperation with the enterprises of automotive industry, power, trade organizations.**

**Open joint-stock company «Vitebsky zavod elektroizmeritelnykh priborov»** is one of steadily developing and perspective enterprises of Vitebsk and Republic of Belarus.

Products with JSC “VZEP” brand by right gained recognition in Republic of Belarus and abroad.

The closed cycle of production from development until the release of finished goods, existence of the accredited control and test station and the qualified experts allow to create production which conforms to modern requirements of quality, technical capabilities, design, are focused on requirements of consumers.

JSC “VZEP” territory is 6,1062 hectare. Floor space - 33466 sq.m.

Operating productions constantly are modernized, the new high-performance equipment is bought, modern advanced technological processes are implemented, innovative production is accustomed and prepared for production.

More than half a century the plant makes and delivers production intended for usual and special service conditions on domestic and foreign markets.

Devices apply on transport and in aircraft, at the industrial enterprises and in houses, on warm and hydroelectric power stations.

Basic codes of the produced goods:

8504400000 Instrument transducers and digital meters

Detailed information you can find on our site [www.vzep.vitebsk.by](http://www.vzep.vitebsk.by)

Modern quality level, reliability, technical capabilities of products and the price are the components which allow the enterprise to conform to the main requirements of standard STB ISO 9001-2009.

There is a continuous process of nomenclature expansion due to release of the new and modernized products.

Representatives in Republic of Belarus and abroad allow to provide timely delivery and service of production of the enterprise.

**We are open for new communications,  
to mutually advantageous projects for business cooperation!**

# LIST of JSC "VZEP" production

## Instrument transducers

№ п/п	Name of production	Number in catalogue	Code of the goods	Application	Photo	Price, \$	Delivery condition
1	AC current transducer	E842	8504403009	for linear conversion of alternating current to an unified DC output signal for changing load without an additional power supply.		22	CPT
2	Power transducer	E848M1	8504403009	for linear conversion of AC three-phase and single-phase four- and three-wire circuits' active power to an unified DC output signal or an unified DC voltage output signal.		177	CPT
3	Transducers	E854M1	8504403009	for linear conversion of alternating current or of AC voltage to an unified DC output signal, and for data transmission via the RS-485 interface (E854 - current; E855 - voltage)		74	CPT
4	Transducers	E855M1	8504403009	for linear conversion of alternating current or of AC voltage to an unified DC output signal, and for data transmission via the RS-485 interface (E854 - current; E855 - voltage)		77	CPT
5	Measuring transducers	E858	8504403009	for conversion of an input signal to an unified DC signal. (E851 sum of analog DC signals ; E856 - direct current; E857 - DC voltage; E858 - DC frequency)		147	CPT
